

How do I maximise my e-commerce profitability? How can I improve the returns on my range? How do I increase customer lifetime value? With minubo as an all-in-one business intelligence solution for e-commerce, our customers get prompt, constructive answers to their questions. From well-known brands such as Intersport, CALIDA and ROSE Bikes to rapidly expanding start-ups like BitterLiebe and SugarShape – e-commerce pros know they can rely on minubo. With that approach, we stand at the forefront of digitalization in retail. Our recipe for success? In-depth analytics and commerce knowledge, big data technology, agile development, excellent customer service and a strong team spirit. Apply now and become part of our team in Hamburg!

## (Junior / Senior) Java Developer / Data Engineer – all genders

Full-time or part-time | Flexible homeoffice

### Your Team, Your Mission, Your Technologies

- We are an interdisciplinary development team of frontend, backend, ETL and DevOps specialists.
- Together with product management, we take care of the continued development of our product: Business Intelligence for Retail as a SaaS solution from the cloud.
- We develop **complex technical solution components** such as reporting, dashboarding and analysis on large data volumes, segmentation of customers and products via flexible criteria, self-service feed APIs as well as algorithmically generated data insights and recommendations – with the look and feel of a modern business application.
- To do so, we rely on agile methods and modern technologies like **Spark, Elastic Search, AWS, Java, Angular, TypeScript, D3, Docker and Kubernetes**.

### Your Tasks

- Continued development of the backend functionality of our business intelligence suite – consisting of e.g. ETL process, real time data processing, Elasticsearch cluster, reporting, analysis, segmentation, and algorithmically generated data insights.
- Conception and development of new features in a team of developers, product managers and domain experts.
- Integration of the services offered by Amazon Web Services (AWS) into our infrastructure.
- Continued development and maintenance of our processes around deployment and monitoring.

---

## Your Profile

- You have a degree with a focus on computer science or a comparable education.
- If you apply as a Senior or Intermediate, you should have several years of experience as a Java developer.
- Ideally, you already have experience in some of the following areas: Big data technologies like Hadoop or Spark and No-SQL databases like Elasticsearch or Mongo-DB.
- You can independently drive projects forward and lead them to success through active coordination with developers, product managers and the management team.
- Strong skills in German and/or English complete your profile.

## Your Benefits

- **Team:** Working at minubo means being part of a great team that sticks together and enjoys pursuing their joint mission just as much as having lunch or regular team events together.
- **Work Atmosphere:** As a grown start-up, we offer flat hierarchies in a dynamic work atmosphere where every idea is welcome.
- **New Challenges:** Our innovative product and the evolving industry offer diverse tasks and new, exciting challenges.
- **Flexibility:** In order to ensure a healthy work-life-balance for our team, we offer flexible work hours and flexible homeoffice possibilities. This way you're free to adapt your work day to your personal needs.
- **Responsibility:** Everyone at minubo is invited to take over their own responsibilities and projects. We appreciate that we are all responsible for minubo's success.
- **Career Development:** We support your education and career objectives and do our best to make your wishes come true.
- **Permanent Contracts:** We offer permanent contracts.
- **Modern Co-Working Space:** Our offices are part of the co-working spaces of Mindspace Hamburg. Enjoy the dynamic atmosphere, manifold working possibilities and benefits as well as a great community.
- **Central Location:** Mindspace is located in the heart of Hamburg - between harbour and city, with a variety of lunch options.
- **HVV:** We support our employees' public transportation tickets (HVV). Our office is easily accessible with public transportation.
- **Sponsored Sport:** We provide sponsored company sport offers at Fitness First, the Urban Sports Club and Gymondo.
- **Company Pension Scheme:** We offer a company pension scheme.

We are looking forward to receiving your application including salary request and possible starting date.
